

ENTERPRISE SERVICES

FLORIDA MUNICIPALITIES/GOVERNMENTS

Structured Cabling | Audio/Visual
Security | Support and Maintenance

State of Florida contracting services for county government and municipal agencies

IT leadership in state and local agencies face significant challenges in today's environment. IT security is a top concern for every government agency, requiring solid industry partners to tackle and overcome this multi-faceted issue.

Today's agencies face complex challenges as they integrate new technologies that allow them to serve an increasingly demanding digital marketplace.

It pays to have an experienced partner in your corner. Our work on major infrastructure contract projects, along with ongoing service and maintenance relationships, well positions us to confidently support all levels of state, county and municipal authority.

AFL Enterprise Services can help to:

- Design or redesign robust cabling systems for an IT enterprise environment to include data centers, telecommunication rooms, and other campus areas
- Protect your assets across all locations with our electronic physical security solutions, including access control, CCTV cameras, and intrusion detection technology
- Cut travel costs and help your employees work and communicate more productively and securely across multiple devices through advanced audio visual and wireless technology
- Restore critical services in the event of an emergency and provide routine service and repair
- Design flexible contracts and unit pricing menus to fit your scope and budget
